## Thin-Film Transistors for Biomedical and Chemical Sensing

Guest Editor:

**Prof. Dr. Jian-Jang Huang**

Graduate Institute of Photonics  
and Optoelectronics, National  
Taiwan University, 1, Roosevelt  
Road, Sec. 4, Taipei 106, Taiwan

Deadline for manuscript  
submissions:

**closed (1 March 2018)**

### Message from the Guest Editor

With the rapid research progress in biological elements, there is a strong demand for low-cost biochips with the capability of massive parallel detection for the prognosis of disease and drug discovery, etc. The modern development of electronic and optoelectronic devices further enables people to develop real-time high-sensitivity sensor arrays. Among those devices, field effect transistor biosensors (FET biosensors) have attracted great attention because they can detect tiny electrical charge difference from biomolecules using very high sensitivity current or voltage meters. The transistor can also be used for signal readout thanks to its transconductance properties. Thin-film transistor (TFT) arrays have already been widely employed in the flat-panel display industry, making the mass-production of TFT sensors available for bio-medical applications.

This Special Issue aims to cover developments in TFT sensors for bio-medical and chemical detection. You are invited to submit manuscripts illustrating newly developed TFT sensors, as well as manuscripts describing novel applications of TFT sensors in solving real life analytical problems.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access :** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
