Deadline for manuscript
submissions:

closed (31 March 2024)

Message from the Guest Editors

In recent years, the need to develop new methodologies for the recovery of strategic and critical metals from various sources has become a necessity, in order to meet the ever-increasing demand from industry and to cope with the scarcity of primary resources. Environmental requirements call for the implementation of increasingly "green" processes, which has led to a growing interest in the scientific community in the development of new technologies for the recovery of noble and strategic metals.

In this context, the journal *Separation*, published by MDPI, has decided to devote a Special Issue to "Recent Advances in Separation and Recovery of Metals".

The objective of this Special Issue is to focus on the development of new methodologies for the recovery of critical and strategic metals.

Given your expertise in this field, I invite you to contribute to this Special Issue by submitting an original research paper. Your contribution will enable this Special Issue to make a significant impact on the scientific research community.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Chromatography*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.6 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2023).
