Deadline for manuscript submissions:
closed (20 June 2024)

Message from the Guest Editor

Oil–water mixtures are widely produced in our daily life and industrial production, evident in oil spills, mechanical processing, etc. The direct discharge of untreated oil–water mixtures will cause serious environmental pollution, ecological damage, and even danger to human health. How to achieve efficient separation of oil–water mixtures has become an urgent global issue.

This Special Issue aims to highlight the progress made in the devleopment of oil–water separation technology. We welcome contributions (original research papers and review articles) that report on advanced technology, new materials, new methods, and membranes with special wettability for separating layered oil–water mixtures or emulsified oil–water mixtures (e.g., oil-in-water emulsions, water-in-oil emulsions).

Special Issue

Editor-in-Chief

Prof. Dr. Frank L. Dorman

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
