Message from the Guest Editor

Dear Colleagues,

In recent years, the use of ionic liquids in the separation sciences for the development of "greener" extraction and purification processes has attracted growing interest from the scientific community.

In this context, the journal *Separation*, published by MDPI, has decided to dedicate a Special Issue to "The Application of Ionic Liquids in Separation and Purification Methods". The aim is to focus on the use of ionic liquids in extraction, separation, and purification processes for strategic or high-added-value compounds (metals, biomolecules, etc.).

Given your expertise in this field, I invite you to contribute to this Special Issue by submitting an original research paper. Your contribution will help this Special Issue have a significant impact on the scientific research community. Thank you for your consideration.

Dr. Laurent Dupont
Guest Editor

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (Analytical Chemistry)
