Smart Cities and Industry 4.0

Guest Editors:

Dr. Diogo Correia

Dr. Leonor Teixeira

Dr. João Lourenço Marques

Deadline for manuscript submissions:

1 June 2024

Message from the Guest Editors

There is lack of published studies about the influence of smart cities in Industry 4.0, and this is seen as a valuable future focus. It can be addressed from two key directions.

The first concerns an improved understanding of the smart city concept and how the evolution of society and its needs, particularly around quality-of-life improvements, may lead industry to adapt and adopt new practices; the second highlights the increasing role of communities and citizens on the instant fulfilment of supply chains and how new urban logistics and manufacturing models may emerge.

In summary, a discussion of how the strategies developed by policymakers together with citizens may impact the industry is necessary.

Message from the Editor-in-Chief

Smart Cities provides an advanced forum for the dissemination of information on the science and technology of smart cities. It publishes reviews, regular research papers (articles) and communications in all areas of research concerning smart cities. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers so that the full experimental results can be reproduced. Manuscripts regarding research proposals and research ideas are particularly welcome.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q1 (Urban Studies)
