Message from the Guest Editors

Dear Colleagues,

There is longstanding and widespread evidence of profound differences in reported levels, experiences and outcomes of child abuse and neglect, between countries, between areas within countries, and between subgroups of children and parents. Such differences have been related to poverty and social class, race and ethnicity, child and parental disability and poor health, gender, age and sexual orientation, as well as to law, policy and practice. Currently, an inequalities perspective is very underdeveloped in child protection research and discourse by comparison with the focus on inequalities in health and in education.

This Special Issue of Social Sciences aims to promote the theoretical, methodological and empirical development of such an inequalities perspective. We welcome submissions from authors with a wide range of disciplinary backgrounds in order to establish new thinking and new evidence about child protection inequalities internationally.

Message from the Editor-in-Chief

Social Sciences is an international open access peer-reviewed journal publishing the latest research across all disciplines of the social sciences including anthropology, criminology, economics, education, geography, history, law, linguistics, political science, psychology, social policy, social work, sociology and related areas. The journal is especially interested in interdisciplinary research, and aims to facilitate the interaction and communication between different social scientific disciplines. The journal welcomes conventional length articles as well as shorter Research Notes or short articles, as long as they meet the journal's standards of quality and originality.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.

Journal Rank: CiteScore - Q1 (*General/Social Sciences*)
