Message from the Guest Editor

Dear Colleagues,

Technology-driven entrepreneurship has emerged as a key driver of sustainable development and economic growth in recent years. Technological innovations empower entrepreneurs to create solutions to address existing and upcoming environmental, social, and economic challenges.

We encourage the submission of studies to this Special Issue which address the challenges of Technology-Driven Entrepreneurship for a Sustainable Future, proposing new scientific insights, classifications, evaluation methodologies, and decision-making process analyses for changing business models and the transition to an environmentally friendly economy, resulting in socially responsible business performance.

The following are the topics of interest for this Special Issue: innovative technologies and social innovations; technologies for circular economy; corporate social entrepreneurship; technological solutions for green business transformation; industry 4.0; changing needs and behaviour models of society; green economy; green marketing, etc.

I look forward to receiving your contributions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
