Deadline for manuscript  
submissions:

**closed (5 March 2024)**

### **Message from the Guest Editor**

Dear Colleagues,

The alignment of management decisions with sustainability principles has come to play a crucial role in the delivery of net zero goals. In recent years, a paradigm shift has occurred, in which the erstwhile focus on the ‘techno-economics’ of engineering project delivery has converged with aspects of environmental management.

The overall aim of this Special Issue is to capture the emerging knowledge in this rapidly expanding field. Therefore, this SI will focus on research that is at the intersection of the engineering project management and environmental management disciplines, and welcomes contributions that range from theoretical studies on novel concepts and frameworks to real-world case studies that reveal their applications.

Research areas may include (but are not limited to) the following:

- Challenges and opportunities related to integrating sustainability in project management;
- Case studies on techno-economic and environmental assessment, and the management of bespoke infrastructure projects (energy, transport);
- Innovative total productive maintenance that integrates environmental management;

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
