submissions:

closed (20 November 2022)

Message from the Guest Editor

The energy sector plays a relevant role in the transformation of the economy towards achieving the targets of carbon neutrality set by the EU under the Paris Agreement. This Special Issue will focus on how energy sectors may adapt to constantly evolving markets, aiming to support the transition to sustainable, reliable, and competitive energy systems. This issue aims to discuss new drivers of energy transition, integration of renewable sources into the energy system, energy pricing, smart grids, and energy market design. Energy researchers are welcome to submit theoretical and empirical papers on any topic related to the theme of the call. We encourage the submission of papers addressing the mentioned policy goals and particularly exploring the following issues: environmental opportunities of energy transition to overcome the pandemic economic crisis, role of the energy transition on economic growth and job creation, energy efficiency, renewable energies, low carbon technologies, carbon capture and storage, strategic technology switching, electricity pricing, electricity storage systems, smart grid networks, smart cities, carbon pricing, energy risk management, and green finance.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
