### Message from the Guest Editors

This Special Issue will focus on the use of sustainable approaches in food cold storage. Food cold storage is one of the most important ways of guaranteeing food quality and safety in whole supply chain management. However, the food cold storage/cold chain process is a long-term state. The transparency, traceability and sustainability of food in cold storage are not easy to know or exploit. It is necessary and important to apply advanced information technology (IT) and management approaches, such as the Internet of Things (IoT), advanced sensing technology and also energy harvesting technology for improving the food transparency, traceability and sustainability in cold storage/cold chain.

Given the importance and relevance of this Special Issue, we invite researchers to contribute original research articles as well as review articles.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
