Message from the Guest Editors

The surface and groundwater quality is mainly imperiled due to industrial, agricultural and urban sectors throughout the world. Different strategies are used to reduce the risk of health hazards like adopting natural remediation techniques, advanced treatment systems, and alternative water resources, etc.

This Special Issue focuses on the following topics:

Appraisal of heavy metal contamination in water resources, soils, sediments, food crops and plant species using machine learning techniques/ multivariate statistics

Integrated analysis on source-exposure risk of heavy metals in the water-soil-plant continuum

Geospatial assessment of environmental pollutants

Modeling and simulation of heavy metal transport in water, soils, and sediments

Advanced treatment processes for management of heavy metal contamination in water, soil and plants

Developing decision support systems for quantifying heavy metal contamination, risk assessment, and remediation

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
