9 June 2024

Message from the Guest Editors

The proliferation of digitization has given rise to a myriad of products, services, and business model innovations, fundamentally transforming how firms pursue sustainability. As these innovations continue to permeate all facets of the business landscape, urgent research is required to delve into the driving factors behind digitalization-induced innovation and its consequent impact on sustainability. This Special Issue aims to enhance the academic understanding of the interconnections among digitization, innovation, and sustainability. Potential contributions may include:

- Digitalization as a strategic action;
- Sustainable growth through digitalization;
- Digitalization-driven product and service innovation;
- Sustainable business models in the digital era;
- Digital-enabled innovation management for sustainability;
- Digital innovation processes and sustainable practices;
- Digital transformation and sustainable value creation;
- Leveraging digitalization for sustainable competitive advantage;
- Environmental and social impact of digitalization;
- Integrating sustainability into digitalization strategies.
