Message from the Guest Editors

Floods are the most frequent type of natural disaster and are often caused by heavy rainfall, rapid snowmelt, or a storm surge from a tropical cyclone or tsunami in coastal areas. Flood resilience in urban and rural communities refers to the ability of cities and rural areas at community level to withstand, adapt to, and recover from flooding events. It is recognised as an important means of reducing the impact of floods, protecting the environment, and enhancing the overall well-being and sustainability of their residents. Flood resilience measures can include both structural and non-structural approaches. Structural measures involve the construction of physical infrastructure, such as flood walls, levees, and stormwater management systems, to control or redirect floodwaters. Non-structural measures focus on policies, regulations, planning practices, flood forecasting and warning, and disaster prevention, preparedness and response mechanisms that aim to minimize flood risks, improve emergency response systems, and promote sustainable land use.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
