Message from the Guest Editors

Dear Colleagues,

Multicriteria decision analysis (MCDA) has been continuously and successfully applied to a countless number of problems related to public services, including health care, education, justice, energy, water, wastewater, sewerage, transports, and urban/rural development, to name a few. In general, policy makers are interested on methodologies capable of reducing public resources waste, which are scarcer each passing day, while they satisfy or exceed most of the stakeholders' expectations. Policies design should account for different (usually conflicting) criteria and points of view associated with the several stakeholders. These policies, meanwhile, must ensure the medium/long-term sustainability of public systems.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
