# **Net-Zero-Energy Building Solutions for Sustainability**

Guest Editors:

#### Dr. Xianhai Meng

School of Natural and Built Environment, Queen's University Belfast, Belfast BT9 6AZ, UK

#### Dr. Sha Liu

Department of Construction Management, Dalian University of Technology, Dalian 116024, China

Deadline for manuscript submissions: **30 September 2024** 

#### **Message from the Guest Editors**

A net-zero energy building (NZEB) is an architectural structure that is designed and built to produce as much energy as it consumes during a year. The achievement of NZEBs requires not only efficiency measures to save energy but also renewable energy and other technologies to meet energy demands. In recent years, NZEBs have become increasingly popular in the built environment. They have the potential to reduce carbon emissions, mitigate climate change, optimize building energy efficiency, and incorporate renewable energy resources.

This Special Issue aims to establish a platform for innovative strategies and promising solutions that improve the performance of NZEBs throughout their lifecycles, contributing to a more sustainable built environment.

These topics range from the design, construction, operation, and maintenance of NZEBs. They cover a range of aspects related to sustainable NZEBs, such as principles, approaches, technologies, policies, etc. Based on these topics, it is possible for researchers and practitioners to have a comprehensive and thorough understanding of how to achieve net-zero energy goals in today's built environment.

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
