

## Sustainable Solutions for Land Reclamation and Post-mining Land Uses

Guest Editors:

**Dr. Francis F. Pavloudakis**

Mineral Resources Engineering  
Department, University of  
Western Macedonia, 50150  
Kozani, Greece

**Dr. Christos Roumpos**

Department of Mining  
Engineering and Closure  
Planning, Public Power  
Corporation of Greece, 10432  
Athens, Greece

**Dr. Philip-Mark Spanidis**

Division of Project Management,  
ASPROFOS Engineering S.A.,  
Greece, 17675 Athens, Greece

Deadline for manuscript  
submissions:

**28 November 2025**

### Message from the Guest Editors

Soil remediation and land reclamation are pivotal in addressing the multifaceted challenges of environmental degradation, social disruption, and economic decline resulting from the closure of surface mines. Through restoring, rehabilitating, and repurposing mined lands, we can not only revive ecosystems but also rejuvenate local economies and communities.

This Special Issue aims to provide a platform to share insights into effective strategies for environmental monitoring, pollution prevention and control, soil remediation, and sustainable land use planning. Furthermore, we seek to explore decision-making frameworks that integrate spatial and non-spatial parameters to guide the selection of appropriate land uses, considering ecological, social, and economic aspects. By promoting interdisciplinary dialogue and knowledge exchange, we aim to explore more sustainable practices in land reclamation and post-mining land management.

In this Special Issue, we welcome original research articles and reviews that may include (not limited to) the following:

- sustainable environment management
- post-mining land uses
- eco-restoration
- circular economy
- sustainability in surface mines

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
