closed (15 December 2022)

Message from the Guest Editors

This Special Issue aims to collect the most updated advances in biochar research, with a focus on the discussion about how waste-derived biochar could contribute to waste minimization, food security, water availability, and climate and land use change. Articles dealing with innovative methods of biochar production and characterization are also welcomed.

- biochar
- biomass waste
- agricultural residue
- food waste
- pyrolysis
- soil amendment
- pollutant adsorption
- carbon sequestration
- land use change
- climate change

an Open Access Journal by MDPI

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
