Message from the Guest Editors

Dear Colleagues,

Contributions are invited for manuscripts describing new innovation models, frameworks and findings that may help address environmentally-related sustainability challenges within cities, including:

- Research on sustainable technological challenges and assessments in the water, wastewater, solid wastes areas, including the reduction of ecological and carbon footprints, recycling and reuse of materials and energy.
- Sustainable urban water management, with focus on reuse and recycle aspects and economics and governance aspects. Of interest are innovative approaches and tools available for supporting and delivering sustainable water/wastes management that is inclusive, resilient and adaptive.
- Conceptual and theoretical frameworks illustrating how technical innovation can contribute to enhance the development of sustainable solutions addressing development challenges, including expected climate changes, in cities and megacities.
- Comparative, analytical and empirical studies on projects and initiatives responding to sustainable environmental-related challenges with paradigm innovation approaches.
