Deadline for manuscript  
submissions:

**30 June 2024**

### Message from the Guest Editors

Water scarcity is a significant problem in many societies, to which the reuse of wastewater after appropriate treatment could offer a sustainable solution. Owing to recent advances in technologies for wastewater treatment and reuse, wastewater effluents with consistently high quality can be achieved, which can then possibly be reused in the agriculture, industry, and urban sectors.

This Special Issue is intended to cover existing techniques which are used to remove different contaminants from wastewater. Moreover, sustainable solutions for wastewater management will also be covered, with an emphasis on agricultural reuse and irrigation technologies. The implications of wastewater reuse in the soil–plant system and their potential solutions will also be a focus of this issue.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
