Deadline for manuscript submissions:

31 August 2024

Message from the Guest Editors

Dear Colleagues,

In the context of urbanization, the economy has achieved rapid development, while the extensive high-input economic development mode and serious pollution have required new manners of production and technique improvement. Meanwhile, a failure to reuse resources increases the risk of resource depletion, environmental degradation, natural disasters, social stability, and economic stagnation. On the other hand, extensive consumption and conspicuous unsustainability can lead to resource waste and environmental pollution, resulting in huge environmental losses and treatment costs. Circular economy is an effective approach to support economic development based on resource reuse, recycling, and waste reduction and can transform the traditional "resource-product-waste" mode $\circ f$ economic development into a "resource-product-waste-recycleproduct" mode of development.

We look forward to your contributions.

Prof.Dr. Xueting Zeng

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
