Graduate Employment and Sustainability in a Global and Changing Labour Market: Challenges and Opportunities for Higher Education

Collection Editor:

Dr. Betina da Silva Lopes

Department of Education and Psychology, University of Aveiro, Aveiro, Portugal

Message from the Collection Editor

This Special Issue aims to address the relationships between higher education institutions and the employability/employment of graduates from around the world, including in developing countries, where higher education is presently in significant expansion. We invite authors to contribute to this Issue by submitting empirical or theoretical research triggering a broader reflection on the integration of sustainability, in its diverse definitions and conceptualizations, into the (higher) education of (future) workers from the natural sciences and social sciences.

Contributions around the following themes are particularly welcomed:

- The changing competencies required in order to respond to the needs of a changing labour market and/or societal needs informing future or ongoing work, and education programmes/strategies
- Development of effective partnerships, including international cooperation, between higher education and employment institutions
- Design, implementation and evaluation of innovative (higher) education and training programmes integrating work-related skills and non-cognitive transferable skills

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
