Deadline for manuscript submissions:

**closed (30 June 2022)**

### Message from the Guest Editors

Dear Colleagues,

Many cities are characterized by high building and housing density, significant problems of liveability linked to changing climatic conditions, excessive consumption of energy and environmental resources, as well as the production of pollutants in the atmosphere and scarcity of green areas and services for the people. It is recognized, therefore, that in the processes of transformation/valorization of urban settlements, it is necessary to propose and implement sustainable interventions capable of pursuing multiple objectives concerning, for example, a more rational use of the resources and territory; the improvement of the quality level of the urban context through the creation of new green areas; and the social and economic-cultural development of the population also through ecosystem services. These types of services, for example, set off processes of transformation in an integrated key: setting in motion productive activities useful for the economic development of the territory; improving the quality of life of citizens; reducing the consumption of energy resources; and increasing the real estate values.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
