# **Message from the Guest Editors**

Heritage Building Information Modelling (HBIM) is now proposed as a novel approach for parametric modelling and integrated process management based on the BIM philosophy. Therefore, we cordially invite researchers and practiotioners to submit papers on how HBIM helps for the following topics and beyond in cultural heritage:

- Advancing the restoration practice;
- Enhancing data capture and management for operations and maintenance;
- Improving the stakeholder engagement;
- Analysing and monitoring the energy performance;
- Automate asset management processes for heritage building owner organisations.
