Message from the Guest Editors

Renewable resources are transforming the economy towards a more sustainable development model. Global climate change and natural resource shortage are forcing the industry and academia to think in a greener way. However, the promotion and application of renewable resources face different situations in developing and developed countries. Attention should be paid to regeneration and recycling of waste as sources of resources in circular economy, the properties and characteristics of infrastructures, and the role of renewable resources in transition toward circular economy during the process.

The Special Issue aims to stress opportunities and challenges in resources and waste management, the interrelation between renewable resources and a circular economy. Topics include but are not limited to: the role of renewable resources in economic growth; challenges in recycling and regenerating waste resources; renewable resources development in developing or developed countries; recycled resources, digital technologies, and circular economy; waste management in a circular economy; renewable resources in transition to a circular economy. We look forward to receiving your contributions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
