Resource Price Fluctuations and Sustainable Growth

Guest Editors:

Prof. Dr. Hua Wang

School of Foreign Studies, Xi'an Jiaotong University, Xi'an 710049, China

Prof. Dr. George Halkos

Department of Economics, University of Thessaly, Volos, 38445 Nea Ionia, Greece

Dr. Shi Wang

School of Economics and Finance, Xi'an International Studies University, Xi'an 710128, China

Deadline for manuscript submissions: **31 July 2025**

Message from the Guest Editors

It has become a pressing issue around the globe to utilize natural resources in a sustainable manner to achieve green growth of the economy and society. The resource curse hypothesis posits that there is a negative correlation between resource dependence and sustainable growth in an economy. Many studies have tested the theory of the resource curse. However, scholars have not taken resource price fluctuations into consideration. In resource-rich areas, the resource industry makes up a large portion of the national economy, and resource price fluctuations exert a greater influence on local economic growth. In a global economic boom, resource demand increases rapidly, leading to a gradual growth in resource prices and resource industry investments, which then promotes rapid economic growth in resource-rich areas.Meanwhile, in a global economic recession, resource demand shrinks, leading to a fall in resource prices and resource industry investments, which leads to a decline in economic growth.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
