Deadline for manuscript submissions: closed (30 September 2021) Dear Colleagues,

Currently, climate change and human activities are deeply influencing the various processes at work in natural ecosystems. As one of the most important terrestrial ecosystems, wetlands function as a key player in mitigating climate change. Although they cover a small percentage of the Earth's surface, wetlands represent the arteries and veins of the landscape and are vital to human life. Wetlands are among the greatest natural carbon stores on our planet and are crucial to agriculture and fisheries. However, wetlands are suffering from the impacts of both the climate change and human activities. Understanding how their natural processes have been affected and their responses to these impacts is important for the current and future protection of wetlands. Therefore, there is an urgent need to obtain a thorough comprehension of the changes and mechanical processes taking place in wetlands so as to take effective measures to combat the dual stress inflicted upon them by nature and human beings.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
