Message from the Guest Editors

A Special Issue entitled Women for Sustainable Energy is dedicated to female scientists who deal with sustainable energy topics, such as new and renewable sources of energy, life-cycle analysis, environmental issues of energy systems, energy policies for sustainability, energy crisis and mitigating actions, transition towards smart cities, energy communities, technologies for sustainable production and utilization, energy efficiency, social acceptance of sustainability initiatives, social equity and ethics in sustainable energy, and other interdisciplinary visions around sustainable energy resources. The role of women in sustainable sciences and engineering is being acknowledged despite underrepresented. We strongly encourage the submission of papers which recognize the role of women and of innovative and creative approaches to sustainability problems.
