Message from the Guest Editors

Dear Colleagues,

Spin chirality, with its profound impact on magnetic properties and behaviors, has emerged as a prominent area of investigation within the realm of molecular magnetism and symmetry relation.

This SI aims to provide a comprehensive platform for disseminating the latest advancements in spin chirality and symmetry relation. We welcome original research articles and reviews that address various aspects of this field, including but not limited to the following:

1. Theoretical and experimental investigations of chiral-induced spin selectivity and its connection with symmetry relation;
2. Chirality and spin dynamics in molecular magnets;
3. Chiral magnetic textures and their manipulation;
4. Chirality in topological materials and its impact on spin transport;
5. How symmetry relation affects the magnetism in various materials.

We look forward to your participation and the opportunity to showcase the remarkable progress being made in this field.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Multidisciplinary Sciences*) / CiteScore - Q1 (*General Mathematics*); Q1 (*Physics and Astronomy*); Q1 (*Computer Science*)
