Message from the Guest Editor

Dear Colleagues,

As Section Editor-in-Chief of the Computer Science and Symmetry/Asymmetry Section of the journal *Symmetry*, I am glad to announce this Special Issue on “Computer Science and Symmetry/Asymmetry: Feature Papers”. We would like to cooperate with some excellent scholars/scientific groups and publish several very important high-level works. Our aim now is to introduce new insights into science development or cutting-edge technology related to the symmetry field in Computer Science which will make a great contribution to the community. The topics include information security, cybersecurity, IoT, robotics, big data, machine learning, artificial intelligence, and other areas of interest associated with computer science and engineering.

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Multidisciplinary Sciences*) / CiteScore - Q1 (*General Mathematics*); Q1 (*Physics and Astronomy*); Q1 (*Computer Science*)
