Deadline for manuscript  
submissions:

**closed (27 February 2015)**

### Message from the Guest Editor

Dear Colleagues,

Supersymmetry provides the only natural candidate for Dark Matter, the neutralino (or WIMP). Current theories can make broad predictions for the range of SUSY masses. We hope to arrange an issue of *Symmetry* that covers some of the experimental limits and theoretical models of SUSY and Dark Matter.

We solicit contributions for this issue.

Prof. Dr. David Cline

## Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Multidisciplinary Sciences*) / CiteScore - Q1 (*General Mathematics*); Q1 (*Physics and Astronomy*); Q1 (*Computer Science*)
