

## Digital Transformation in Services Production Systems and Product Manufacturing

Guest Editors:

**Prof. Dr. Ikpe Justice Akpan**

Department of Information Systems and Business Analytics, Kent State University, 330 University Drive NE, New Philadelphia, OH, USA

**Prof. Dr. Bamidele Adebisi**

Department of Engineering, Manchester Metropolitan University, Manchester, UK

**Prof. Dr. Murali S. Shanker**

Department of Management & Information Systems, Kent State University, Kent, OH 44242, USA

Deadline for manuscript submissions:

**closed (31 March 2023)**

### Message from the Guest Editors

The use of technologies to transform production systems has a long history. It remains a significant contributor to the birth and development of the industrial development witnessed globally. While product manufacturing systems have attracted significant scientific scholarship production over the years, the same cannot be said about the service production systems, which remain complex. The service production system explains structure and operation activities that enhance task execution, task effectiveness, and task efficiency, culminating in service quality and improved performance. The above discourse offers motivation for this call for papers. The Scope of the Special Issue will cover the broad areas of digital and technological transformation and sustainable development of SMEs' service production and manufacturing systems.

The area of coverage in this Special Issue includes but is not limited to Strategic Sourcing, Strategic Alliances, Service and Product Design, Supply Chain, Logistics, Operation Activities, Process Innovation, and Challenges and Opportunities.

## Message from the Editor-in-Chief

*Systems* is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), Ei Compendex, dblp, and other databases.

**Journal Rank:** JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q1 (Modeling and Simulation)
