The Effect of Airborne Contaminants Exposure on Early Health Damage Biomarkers

Guest Editors:

Prof. Dr. Shaowei Wu

Department of Occupational and Environmental Health, School of Public Health, Health Science Center, Xi'an Jiaotong University, Xi'an 710061, China

Prof. Dr. Jun Yang

School of Public Health, Guangzhou Medical University, Guangzhou 511436, China

Deadline for manuscript submissions:

closed (25 April 2024)

Message from the Guest Editors

Air pollution is the contamination of air due to the presence of various airborne contaminants that are harmful to human health, and is among the leading risk factors for disease burden globally. It has been demonstrated that airborne contaminants could enter the body through the respiratory tract and circulatory system, cause complex internal cellular responses that are followed by biological effects, and finally lead to adverse health outcomes including chronic diseases. The cellular responses and biological effects lie in the early stage of health damage of airborne contaminants and could be reflected by changes in various biomarkers related to inflammation, oxidative stress, endothelial dysfunction, coagulation, autonomic imbalance, metabolic disorder, epigenetic modifications, etc. The Special Issue aims to publish studies investigating the early health damage biomarkers and related mechanisms for the effect of airborne contaminants, which are important for the evaluation and monitoring of health damage related to air pollution in the population. Your contribution to the Special Issue is greatly appreciated and will be a great addition to the existing literature.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Toxicology*) / CiteScore - Q2 (*Chemical Health and Safety*)
