Deadline for manuscript
submissions:

31 May 2024

Message from the Guest Editors

Across the globe, disadvantaged groups are exposed to environmental pollutants at higher rates and concentrations, either intentionally due to prejudice or unintentionally due to systemic racism. The field of environmental justice aims to detect these disproportionate exposures and develop interventions to alleviate them, providing equitable access to healthy environments and protection from environmental harms.

This Special Issue will feature reports of known and emerging contaminants with disproportionate impacts on minoritized communities. Articles can focus on detection and analysis, human exposure measurement, toxicological studies, and mitigation approaches. Original research articles, narrative and systematic reviews, meta-analyses, and short communications will be considered for inclusion, with a focus on bringing environmental justice issues to light by identifying sources and presenting strategies to mitigate exposures with approaches that account for cultural sensitivities by including community input and participation.

We look forward to receiving your contribution.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Toxicology*) / CiteScore - Q2 (*Chemical Health and Safety*)
