Deadline for manuscript  
submissions:

**closed (31 January 2018)**

### Message from the Guest Editors

Dear Colleagues,

Algae and cyanobacteria are phytoplankton present in all aquatic environments. Some of them produce natural toxins to which human beings and animals may be exposed to through air, food, drinking water, or recreational activities. However, people are unaware of the threat of toxin exposure, and the potential effects, on their health.

This Special Issue deals with scientific knowledge of the interrelationships between aquatic toxins associated with harmful algal blooms events and adverse human health effects, in order to improve public understanding.

The scope is multidisciplinary, with articles from wide range of subjects encompassing basic research, in vivo animal experiments, epidemiologic studies, risk assessment, and even relevant social and environmental topics.

The Guest Editors encourage integrative approaches with applications in toxin monitoring, promotion of safe environments and implementation of outreach activities to control, prevent or reduce further toxin exposures and to ensure public health.

Prof. Natalia Vilariño  
Prof. M Carmen Louzao

## Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **CAPLus / SciFinder**, **AGRIS**, and **other databases**.

**Journal Rank:** JCR - Q1 (*Toxicology*) / CiteScore - Q1 (*Toxicology*)
