an Open Access Journal by MDPI

Nuclear Physics and Multimessenger Astrophysics

Guest Editors:

Prof. Dr. David Blaschke

Dr. Konstantin Maslov

Prof. Dr. Elena Litvinova

Dr. Evgeni Kolomeitsev

Deadline for manuscript
submissions:

closed (30 November 2021)

Message from the Guest Editors

Dear Colleagues,

This Special Issue is based on selected contributions to the International Workshop "Infinite and Finite Nuclear Matter" (INFINUM-2020). However, it is also open to other contributions on this topic. The goal of INFINUM-2020 is to bring together researchers studying various aspects of the physics of atomic nuclei and neutron star physics, stimulating the interaction between the two communities. In the new era of multimessenger astronomy opened by the detection of gravitational waves (GWs) from a binary neutron star merger and its electromagnetic counterpart, the gamma-ray burst and the associated kilonova, it is extremely important to understand the interplay between the strong interaction in the dense medium and GW observables.

Message from the Editor-in-Chief

The multidisciplinary journal *Universe* is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the Advisory and Editorial Boards, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
