submissions:

closed (30 June 2021)

Message from the Guest Editor

Dear Colleagues,

The Special Issue will reflect on the place that cultural and natural heritage occupy both in our lives and for territorial development, as well as on the need to protect such unique values for future generations. It will be structured around the idea that nature and culture are an indivisible whole, meaning that natural and cultural heritage should be recognized, understood, planned, and managed together. This may also be a driver of the efficiency of place-based policies. In this context, the natural and cultural attractiveness of cities and territories, and the achievements of culturally and naturally creative cities, territories, nations, and industries can be addressed in this Special Issue. Nature- and culture-based solutions are often less costly, more resilient, and more effective in the long term; they can create jobs and economic growth; and they can promote the sustainability and frugality of cities and territories.

Message from the Editor-in-Chief

Urban Science is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of “science” includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the maximum length of the papers.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#) and [other databases](#).

Journal Rank: JCR - Q1 (Geography) / CiteScore - Q1 (Urban Studies)
