Message from the Guest Editor

Dear Colleagues,

Despite being the oldest zoonotic disease known to humanity, rabies still kills tens of thousands of people each year. Moreover, dog-mediated rabies represents 99% of human cases. Improving surveillance systems and control and elimination programs for canine rabies, therefore, is a global public health imperative and should be at the forefront of veterinary science priorities.

This Special Issue is dedicated to discussing recent developments in canine rabies surveillance, and exploring new control and elimination strategies for canine rabies. The pressing challenges to eliminate canine rabies require transdisciplinary teams and projects; manuscripts using the One Health approach are specially encouraged for this special issue. The Special Issue will highlight new research questions, current challenges, innovative approaches and techniques, and will bring attention to one of the most neglected diseases in the world.

We look forward to your valuable contributions on this interesting and important topic.

Special Issue
The Veterinary Sciences (ISSN 2306-7381) is an international peer-reviewed journal (Veterinary Sciences) in City Scholarly (Open Access Journal) that

Pharmacology and Zoological
Medicine, Faculty of Veterinary
Medicine, Ghent University,
Salisburylaan 133, B9820
Merelbeke, Belgium

2. Department of Infectious
Diseases and Public Health,

Jockey Club College of Veterinary
Medicine and Life Sciences, City
MDPI, St. Alban-Anlage 66,
University of Hong Kong, 31 To
Yuen Street, Kowloon, Hong
Kong SAR 999077, China

aims at publishing research in all fields of veterinary
medicine in a democratic way. We encourage scientists to
publish their original research articles, reviews,
communications, and short notes in as much detail as
possible. Articles submitted that involve subjecting animals
to unnecessary pain or suffering will not be accepted, and
all articles must be submitted with the necessary ethical
approval (please refer to the Ethical Guidelines for more
information).
