closed (29 November 2018)

Message from the Guest Editors

Dear Colleagues,

This Special Issue is dedicated to the 2nd Symposium of the Canadian Society for Virology (CSV2018), which will be held in Halifax, Nova Scotia, Canada, 13–15 June 2018. The symposium will be a signature event held on campus at Dalhousie University on its 200th anniversary, and fittingly, on the 100th anniversary of the 1918 influenza pandemic. This symposium will provide an important opportunity for Canadian virologists across different disciplines (basic, clinical, social, epidemiological, etc.) to meet and foster exchanges, thereby creating a broader base of research expertise committed to tackling global challenges of virus infections. Presentations will encompass a wide variety of virus-related topics, including Emerging Viruses, Viral Subversion of Host Cell Processes, Viruses of Microbes, Antivirals and Vaccines, Emerging Methods in Virology, RNA in Virus Infection, Viruses of Flora and Fauna, and Antiviral Innate Immunity.

Symposium participants are invited to contribute original research papers or reviews to this Special Issue of *Viruses*.

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
