Deadline for manuscript submissions:

**1 October 2024**

### Message from the Guest Editors

Dear Colleagues,

Viral diseases are responsible for significant economic losses in livestock production worldwide and pose a constant threat to food security. Understanding viral pathogenesis and host immune responses is critical for developing and refining appropriate diagnostic methods and vaccines. The surveillance and characterization of emerging viral pathogens are also essential. Therefore, the scope of this comprehensive veterinary virology topic is related to advances in the pathogenesis, immune responses, vaccinology, and detection of endemic and emerging viral diseases in ruminant livestock species and swine.

Dr. Fernando Vicosa Bauermann

## Message from the Editor-in-Chief

*Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

**Journal Rank:** JCR - Q2 (*Virology*) / CiteScore - Q1 (*Infectious Diseases*)
