Application of Sludge-Based Materials for Wastewater and Sludge Treatment

Guest Editors:

Dr. Ming Zheng

School of Environmental and
Chemical Engineering, Shanghai
University, Shanghai 200444,
China

Dr. Qian Ping

School of Environmental Science
and Engineering, Tongji
University, Shanghai 200092,
China

Deadline for manuscript
submissions:

closed (21 April 2024)

Message from the Guest Editors

For this Special Issue, original research articles and reviews are welcome for submission. Research areas may include, but are not limited to, the following: sludge-based materials, wastewater treatment and waste biomass reuse.

Keywords

- sludge-derived products
- wastewater
- waste biomass
- biochar
- adsorption
- photocatalysis
- electrocatalysis
- anaerobic fermentation and digestion
- emerging contaminants

France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
