Application of Nanomaterials in Water Treatment

Guest Editors:

Dr. Konstantinos Simeonidis

Department of Solid State
Physics, Aristotle University of
Thessaloniki, Thessaloniki,
Greece

Dr. Kiriaki Kalaitzidou

Analytical Chemistry Laboratory,
Department of Chemical
Engineering, Aristotle University
of Thessaloniki, 54124
Thessaloniki, Greece

Deadline for manuscript
submissions:

closed (30 November 2022)

Message from the Guest Editors

Dear Colleagues,

Following the increasing awareness of people on health and environmental safety issues related to water consumption for drinking purposes, household or industrial uses, the need to develop novel methodologies toward quality improvement or toxicity degradation becomes more intense. Recent advances in nanomaterials synthesis and properties tuning emerge as an excellent substrate to design new treatment approaches for the efficient capture of pollutants. The high surface area and chemical activity offered by nanomaterials is key to their implementation in water treatment practices, especially when direct adsorption mechanisms or catalytic assistance are the main objectives. However, such applications require the availability of nanomaterials in large quantities, while their cost should be kept comparable to competing conventional technologies to ensure viability. [...]

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology
and Environment, Centre
National de la Recherche
Scientifique (CNRS), University of
Toulouse, Campus ENSAT,
Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
