### Message from the Guest Editors

This Special Issue aims to showcase research papers, short communications, and mini-reviews that highlight new inventions in the field of electrochemical technologies for water remediation and quality assurance.

### Keywords

- water remediation
- water pollution
- electrochemical water testing
- nanomaterials for water remediation
- water pollution
- water degradation
- electrochemical sensors for water pollution

Deadline for manuscript submissions:

**22 October 2024**

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
