Harmful Algae Control

Guest Editor:

Prof. Dr. Yu Hong

Beijing Key Laboratory for Source Control Technology of Water Pollution, College of Environmental Science and Engineering, Beijing Forestry University, Beijing 100083, China

Deadline for manuscript submissions:

closed (30 June 2024)

Message from the Guest Editor

The content of this Special Issue is not limited the following areas, and any innovative full-length papers, reviews, and review articles that contribute to the efficiency of harmful algal control are welcome. We look forward to receiving submissions for this Special Issue from researchers around the world.

Keywords

- water bloom control
- red tide control
- emerging pollutants
- physical methods
- chemical methods
- biological methods
- ecological methods
- mechanisms of action
- short-term effects
- long-term effects

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
