closed (31 October 2018)

Message from the Guest Editors

Dear Colleagues,

Our aim with this Special Issue is to highlight recent and emergent concepts and approaches to water governance that re-center the political in relation to water-related decision making, uses, and management. To do so, is at once to focus on diverse meanings and values of water, and related contestations regarding its use, or its importance for livelihoods, identity, or place-making. We are especially interested in work informed by political ecology, cultural politics, hydrosocial and hydropolitical approaches, environmental justice, hydrocitizenship, infrapolitics, political-economies of water, and water-related governmentalities.

Prof. Leila M. Harris

Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
