and Construction Management,
Gordon and Jill Bourns College of
Engineering, California Baptist
University, Riverside, CA, USA

A contaminant of emerging concern, generally referred to as an “emerging contaminant”, is a naturally occurring or synthetic chemical or substance recently detected or suspected to be present in water and whose toxicity or persistence pose some risk to human health or the environment. Emerging contaminants are usually not regulated or have no established health goals. The lack of scientific information on their detection, treatment and risk prevents evaluation for regulatory action.

Deadline for manuscript
submissions:

closed (15 November 2019)

This Special Issue is devoted solely to emerging contaminants in water, bringing together recent research findings from leading scientists, the practical experiences of operators and engineers, as well as from water regulators. The goal is to assemble contributions on the detection, treatment, or regulatory experiences regarding emerging contaminants in water.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
