Integrated Constructed Wetland Systems: Design, Operation, and Performance

Guest Editor:

Prof. Dr. Miklas Scholz

Division of Water Resources
Engineering, Faculty of
Engineering, Lund University,
22100 Lund, Sweden

Deadline for manuscript
submissions:

closed (31 December 2017)

Message from the Guest Editor

Dear Colleagues,

This Special Issue is fully dedicated to the publication of original articles and critical review papers on integrated constructed wetland systems. The focus will be on the design, operation, and performance of wetlands treating wastewater. The assessment of challenges, such as climate change, diffuse pollution, groundwater contamination and flooding, linked to wetland operation are particularly welcome.

Scientifique (CNRS), University of
Toulouse, Campus ENSAT,
Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
