Future Water Resources and Air Pollution Management and Innovation

Guest Editors:

Dr. Lirong Liu

Center for Environment and Sustainability, University of Surrey, Guildford, Surrey GU2 7XH, UK

Dr. Xiaying Xin

School of Energy and Environment and the State Key Laboratory of Marine Pollution, City University of Hong Kong, Hong Kong, China

Dr. Wendy Huang

Department of Civil Engineering, Schulich School of Engineering, University of Calgary, Calgary, AB, Canada

Message from the Guest Editors

This Special Issue aims to collect high-quality research papers and critical reviews that are focused on (1) water resource planning and management innovations for emerging cities for the future, (2) water resource protection and water pollution management in new rural construction, (3) the optimal treatment and management of industrial wastewater (chemical wastewater and nuclear wastewater), (4) innovative flood disaster management, (5) greenhouse gas emission measures and management under carbon neutralization targets, (6) air pollution detection, control and management innovation. This Special Issue will collect a wide range of research views and achievements in relevant fields around the world, and provide readers with different views, theories and research data. It will provide a reference for individuals and management units who are responsible for water resource management and air pollution management.

Deadline for manuscript submissions:

closed (20 October 2022)

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology
and Environment, Centre
National de la Recherche
Scientifique (CNRS), University of
Toulouse, Campus ENSAT,
Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
