Message from the Guest Editors

Dear Colleagues,

Regional anaesthesia has always been a fundamental option in pain management. The advent of new anaesthetics and ultrasound guidance has permitted an increased diffusion of regional anaesthesia among practitioners and its integration into a multimodal strategy pain management strategy. As a consequence, we have also gained deeper knowledge of anatomy and diffusion kinetics after anaesthetic blocs and new techniques are being increasingly developed.

This Special Issue is dedicated to regional anaesthesia and will include the following topics:

- Acute pain and perioperative medicine,
- Oncoanaesthesia,
- Chronic pain,
- Intensive care,
- Emergency pain,
- Pediatric pain,
- Anatomy and techniques,
- Pharmacology;
- Education.

We welcome the following types of articles:

- Epidemiologic studies,
- Meta-analyses,
- Systematic reviews,
- Original articles
- Case reports;
- Pharmacology studies

University of Health Sciences,
Kaunas, Lithuania

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*General Medicine*)
