Aims

Biomolecules publishes Articles, Reviews, Communications and Editorials that are relevant to any field of study that involves biology, chemistry, material sciences, molecular medicine, and physics. The journal has a strong focus on structures and functions of bioactive and biogenic substances, molecular mechanisms with biological and medical implications as well as biomaterials and their applications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible, there is no upper limit on the length of papers. The full experimental details must be provided such that the results can be reproduced.
