

## Supplementary Table S1: Search Strategy

Database	Query	Search details	Results
PubMed	CETP inhibitors OR anacetrapib OR evacetrapib OR dalcetrapib) AND Cardiovascular Outcomes	{"("CETP"[All Fields] AND ("antagonists and inhibitors"[MeSH Subheading] OR ("antagonists"[All Fields] AND "inhibitors"[All Fields]) OR "antagonists and inhibitors"[All Fields] OR "inhibitors"[All Fields]) OR {"anacetrapib"[Supplementary Concept] OR "anacetrapib"[All Fields]) OR {"evacetrapib"[Supplementary Concept] OR "evacetrapib"[All Fields]) OR {"dalcetrapib"[Supplementary Concept] OR "dalcetrapib"[All Fields]) AND ("cardiovascular system"[MeSH Terms]) OR ("cardiovascular"[All Fields] AND "system"[All Fields]) OR "cardiovascular system"[All Fields] OR "cardiovascular"[All Fields] OR ("cardiovasculars"[All Fields]) AND ("outcome"[All Fields] OR "outcomes"[All Fields])}	248
Embase	obicetrapib OR evacetrapib OR dalcetrapib OR anacetrapib OR cholesteryl ester transfer protein Inhibitor		245
Cochrane Library	obicetrapib OR evacetrapib OR dalcetrapib OR anacetrapib OR cholesteryl ester transfer protein Inhibitor		176
Medline	obicetrapib OR evacetrapib OR dalcetrapib OR anacetrapib OR cholesteryl ester transfer protein Inhibitor		312

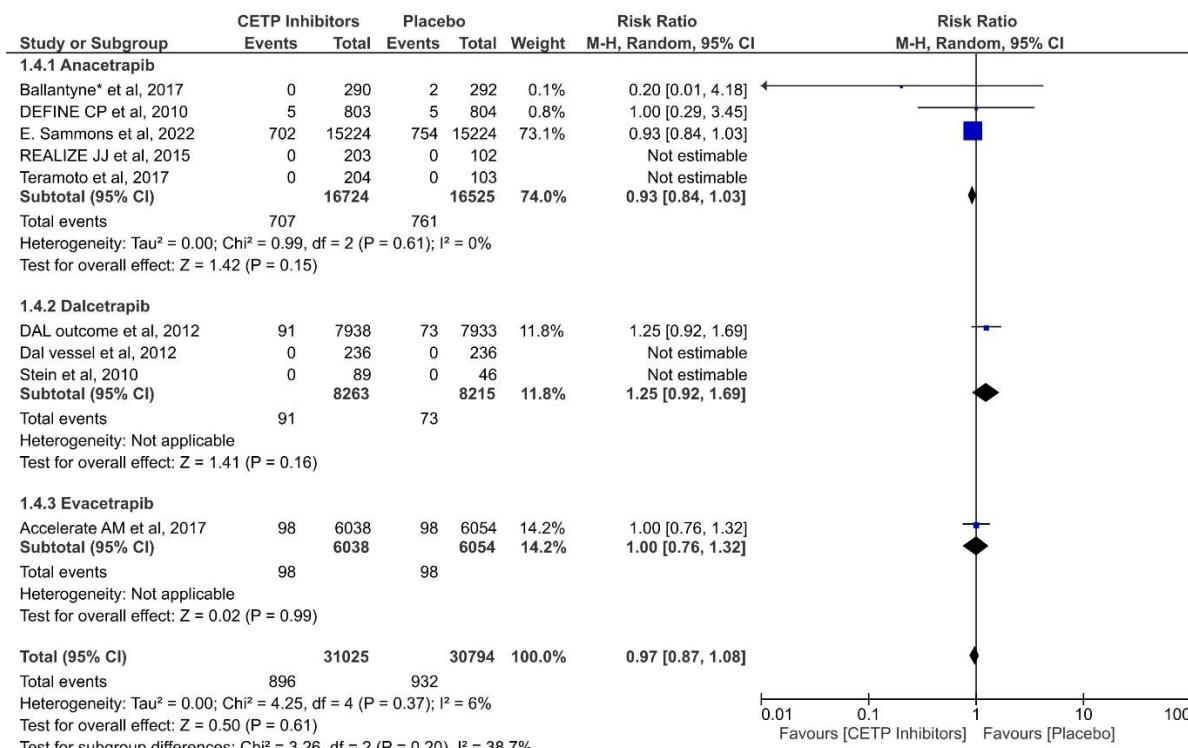

**Supplementary Figure S1: Quality assessment of the independent researcher XY.** The majority of the studies were deemed to have a low risk of bias, but five of them were flagged for exhibiting a high risk of bias. This was primarily attributed to issues concerning how the outcome was measured and which outcomes were selected for reporting. Accelerate AM et al., 2017 [1]; Ballantyne\* et al., 2017 Am J Cardiol Vol. 120 [2]; Ballantyne et al., 2017 [3]; DAL outcome et al., 2012 [4]; Dal plaque ZA et al., 2011 [5]; Dal vessel et al., 2012 [6]; DEFINE CP et al., 2010 [7]; E. Sammons et al., 2022 [8]; Menon et al., 2020 [9]; REALIZE JJ et al., 2015 [10]; REVEAL et al., 2017 [11]; Stein et al., 2010 [12]; Teramoto et al., 2017 [13];

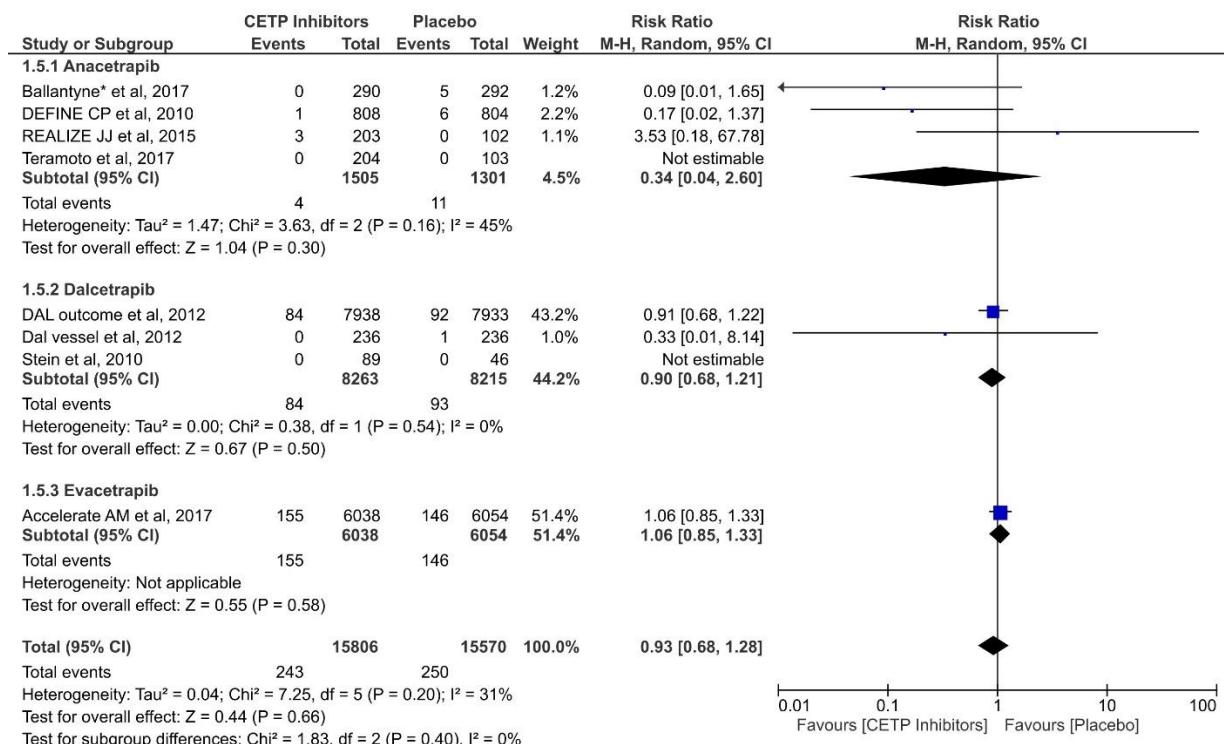

**Supplementary Figure S2: Funnel Plot.** An asymmetrical distribution of data points was noted in the funnel chart, indicating the possibility of publication bias within the studies. This pattern may also indicate a potential bias associated with smaller studies. Significance was determined by a p-value  $< 0.05$ , indicating statistical significance.

## SUPPLEMENTARY FOREST PLOTS

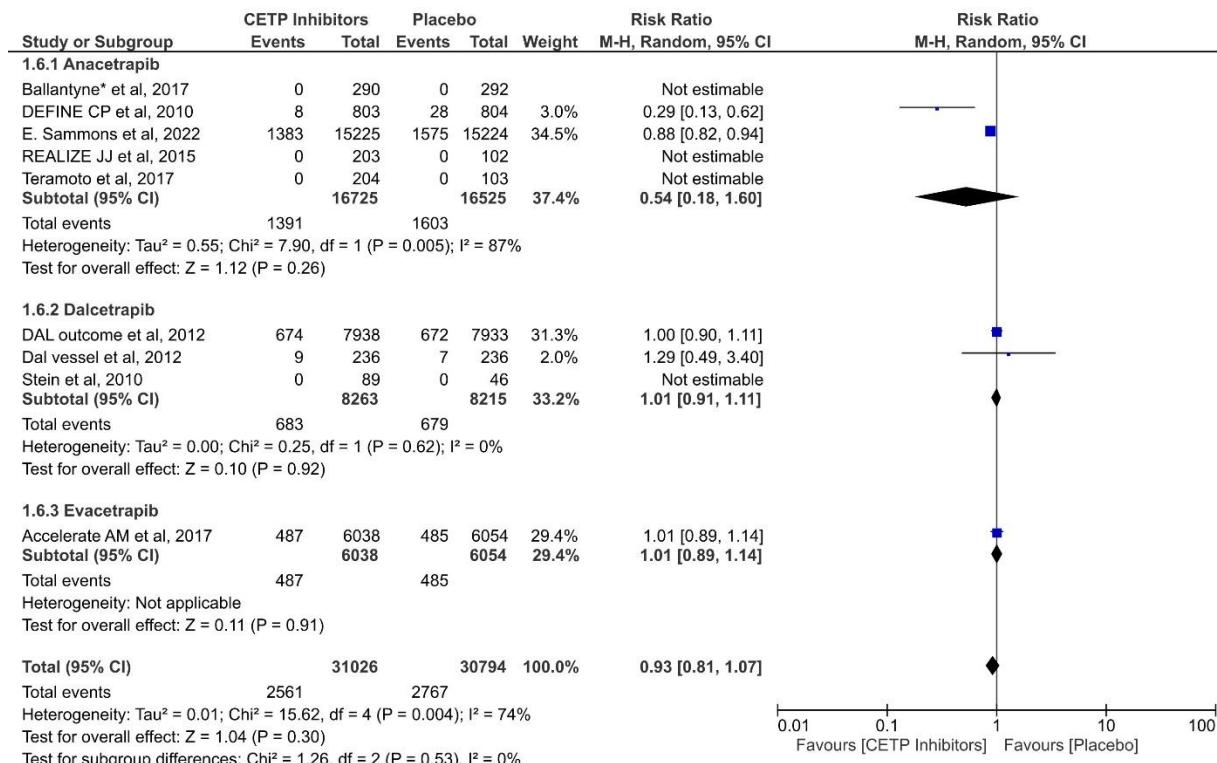

**Supplementary Figure S3.** Forest Plot of the Outcome of Stroke

Ballantyne\* et al., 2017 Am J Cardiol Vol. 120 [2]; DEFINE CP et al., 2010 [7]; E. Sammons et al., 2022 [8]; REALIZE JJ et al., 2015 [10]; Teramoto et al., 2017 [13]; DAL outcome et al., 2012 [4]; Dal vessel et al., 2012 [6]; Stein et al., 2010 [12]; Accelerate AM et al., 2017 [1]. The values of each study (represented by black diamonds), in which the size is determined by 95% CI; the effect size of each individual study in the meta-analysis (represented by blue squares).

**Supplementary Figure S4.** Forest Plot of the Outcome of Hospitalization due to Acute Coronary Syndrome

Ballantyne\* et al., 2017 Am J Cardiol Vol. 120 [2]; DEFINE CP et al., 2010 [7]; E. Sammons et al., 2022 [8]; REALIZE JJ et al., 2015 [10]; Teramoto et al., 2017 [13]; DAL outcome et al., 2012 [4]; Dal vessel et al., 2012 [6]; Stein et al., 2010 [12]; Accelerate AM et al., 2017 [1]. The values of each study (represented by black diamonds), in which the size is determined by 95% CI; the effect size of each individual study in the meta-analysis (represented by blue squares).

**Supplementary Figure S5.** Forest Plot of the Outcome of Revascularization

Ballantyne\* et al., 2017 Am J Cardiol Vol. 120 [2]; DEFINE CP et al., 2010 [7]; E. Sammons et al., 2022 [8]; REALIZE JJ et al., 2015 [10]; Teramoto et al., 2017 [13]; DAL outcome et al., 2012 [4]; Dal vessel et al., 2012 [6]; Stein et al., 2010 [12]; Accelerate AM et al., 2017 [1]. The values of each study (represented by black diamonds), in which the size is determined by 95% CI; the effect size of each individual study in the meta-analysis (represented by blue squares).
